CORRECTIONS

Fondaparinux Compared with Enoxaparin for the Prevention of Venous Thromboembolism after Hip-Fracture Surgery (November 1, 2001;345:1298-304). On page 1300, the sentence that begins five lines from the bottom of the right-hand column should have read, "The incidence of symptomatic venous thromboembolism was low (0.5 percent), with no difference between the two groups," not "6.5 percent," as printed. We regret the error.

Recurrence Rates after Treatment of Breast Cancer with Standard Radiotherapy with or without Additional Radiation (November 8, 2001;345:1378-87). On page 1378, the last sentence of the Results paragraph of the abstract should have read, "In patients 41 to 50 years old, the rates were 9.5 percent and 5.8 percent, respectively (P=0.02). At five years, no differences between treatment groups were found in the rates of metastasis or overall survival (which were 87 and 91 percent, respectively)."
