CORRECTION

Derivation of Nephrogenic Adenomas from Renal Tubular Cells in Kidney-Transplant Recipients (August 29, 2002;347:653-9). The last sentence in the left-hand column of page 654 should have read, "Three female and three male patients who had nephrogenic adenomas without preceding renal transplantation, five patients with bladder endometriosis, and one with prostatic hyperplasia served as controls," rather than "Three female and three male patients who had nephrogenic adenomas without preceding renal transplantation (five patients with bladder endometriosis and one with prostatic hyperplasia) served as controls." We regret the error.
